Excellent wear resistance
UV stable, Seamless sleeve

REMA TIP TOP - CONCRETE DISCHARGE CHUTE
Seamless rubber sleeves

REMA TIP TOP - CONCRETE DISCHARGE CHUTE

Concrete Solutions

Background

Wear and tear caused by varying height truck mixers and high volume concrete batching can result in frequent failure when using low grade discharge chutes. Repeated replacement creates excessive maintenance cost to plant, interruptions to production and repeated health and safety risks from working at height.

At REMA TIP TOP INDUSTRY UK Limited we manufacture discharge chutes which have been designed and engineered to provide effective and durable resistance to dispensed concrete ready mix, UV light and vehicle reversing.

Key features

- Excellent resistance to abrasion, tearing and weather.
- UV stable.
- Seamless sleeve.

Benefits

- Maintenance - Ease of changing the units compared to other competitors units.
- Productivity - less plant downtime, better reliability.
- Risk - reduce time working at height.
- No clagging.
- Simplify Loading - high visibility for easier truck positioning.
- Competitively priced.

Manufacturing and development

REMA TIP TOP INDUSTRY manufacture and develop the concrete discharge chutes at their UK design and production facility in Doncaster. The chutes (socks) are fabricated using high grade abrasion resistant inner rubber with a 2 mm outer UV stable Seamless sleeve.

Typical sizes

Diameter	Length
6"(152.4mm)	1400mm
8"(203.2mm)	1400mm
10"(254mm)	1400mm
12"(304.8mm)	1400mm
16"(406.4mm)	1400mm
20"(508mm)	1400mm
24"(609.6mm)	1400mm

Concrete discharge chutes are available with either 6mm, 8mm or 10mm inner sleeve. In addition to the inner dimension, The UV protective lining is 2mm thick.

Please contact a technical sales representative for a full breakdown of pricing and product information to determine the correct specification for your individual requirements.

Installation process

REMA TIP TOP - CONCRETE DISCHARGE CHUTE

Seamless service

REMA TIP TOP service depots:

Eastern Division	Doncaster
Midland Division	Stoke-On-Trent
East Anglia Division	Thetford
North West Division	Standish
Western Division	Bristol
South Wales Division	Bridgend
South East Division	Dartford
North East Division	Hartlepool
Scotland Division	Hamilton
Ireland Division	Kells

Comprehensive industry service

- Rubber Belting
- Drum Lagging
- Conveyor Maintenance
- Chute Lining
- Wear Protection
- Fabrication
- Installation
- Service 24/7 - 365 days
