TRU-TRAC® TAPER TROUGH TRACKING UNIT
Belt Tracking solutions for tracking and aligning conveyor belts

Increased production capacity
Reduced spillage and waste
BELT TRACKING SYSTEM SOLUTIONS FOR THE TRACKING AND ALIGNING OF CONVEYOR BELTS

REMA TIP TOP is the preferred sales partner of TRU TRAC for EUROPE. Tru-Trac Rollers (Pty) Ltd. is the world’s leading supplier of solutions relating to problems experienced with the tracking and aligning of conveyor belts.

Tru-Trac® conveyor trackers are designed around Patented and Proven Technology. Tru-Trac® is reliable, maintenance free, operates in all conditions and is simple to install.

The Tru-Trac® Taper Trough Tracker unit, is the reliable and effective solution for tracking and alignment conveyor issues. Conveyor belts can frequently run off-centre which can lead to product spillage damage to the conveyor structure, production loss, conveyor belt damage and unplanned down time.

The Tru-Trac® Taper Trough Tracking unit has been meticulously developed over a number of years with the commitment to deliver a high grade quality product manufactured from premium component parts. A long service life is assured for both the tracking unit and conveyor belts. This provides the end user with a product that is both reliable and economical in short and long term production processes.

The REMA TIP TOP - Tru-Trac® Taper Troughing Unit is available for 450mm belt widths up to 1200mm belt widths as a standard.

All dimensions in mm. Non standard trackers can be made to customer specifications.

ADVANTAGES
- Increased production capacity
- Maximum protection against damage to the belt as well as to the conveying system
- Reduced spillage and waste
- Reduced cleaning costs
- Reduced energy costs
- Robust Heavy Duty design, easily installed
- Maintenance-free Sealed Bearings
- Operates under all conditions
- Suitable for reversible conveyors with Excellent performance
- Long service life
- Roller Lagging - Available in high grade rubber, polyurethane and fire resistant lagging all in 12mm
BELT TRACKING SYSTEM SOLUTIONS FOR THE TRACKING AND ALIGNING OF CONVEYOR BELTS

Experts
Our highly trained site fitting teams provide quality on-site belt fitting and belt vulcanising. We also offer conveyor maintenance programmes, industrial belt scrapers and belt condition surveys.

All accompanied by the highest quality health and safety standards, safe systems of work, risk assessments and method statements.
